PRESS RELEASE

Execulink Expands 1 Gbps Speeds to Norwich, Otterville and Ilderton

Woodstock, ON – October 21, 2014 – Execulink Telecom announced the expansion of their 1 Gbps Internet service to their existing Fibre Communities of Norwich, Otterville and the Timberwalk Subdivision in Ilderton. The independent telecommunication provider can now deliver one of the fastest Internet speeds available in Ontario to these areas.

This substantially faster speed tier is available over Execulink's Fibre Optic network. Residents and businesses now have access to Internet speeds over 50x faster than what was previously available in these areas.

"By deploying Fibre Optics in these communities, there is a promise that the technology would not only meet the demands of today's needs but prepare these rural areas for future technology" CEO Ian Stevens exclaimed, "We are happy to keep our promise by delivering these unprecedented speeds, bringing the future of broadband to these smaller communities."

Increased Internet speeds are critical for local development & sustainability – whether it's providing seamless video conferencing for corporations and students or improving the quality of video streaming and gaming, this Fibre Optic upgrade will undoubtedly benefit the entire community.

For more information on the Fibre services (including the 1Gbps) or to sign up for Fibre connection in these areas, please visit fibre.execulink.ca.

About Execulink

In operation since 1904, Execulink Telecom has evolved from a small independent local telephone company into one of the leading telecommunications providers in Ontario. Through innovation and forward-thinking, we cultivated our local telephony offerings to provide a full-scale suite of

telecommunications services including data, internet, television, mobility and advanced voice features. These services are now available to all levels of industry, encompassing 50,000 business, enterprise, government, and residential customers.
