

## Woodstock's own Execulink Telecom gives residents an awesome TV experience!

Residents of Woodstock have been enjoying the benefits of Link TV from Execulink Telecom since August 2017. With the freedom to customize their channel line-up, watch on multiple devices and catch-up on missed shows- customers are experiencing TV in a whole new way!

What makes Link TV so unique is its total personalization and flexibility. With a variety of channel options, customers have the freedom to create a TV lineup that has only the channels they want, with the option to add more as they please. Not only that, but with the exclusive Virtual Set-Top Box, viewers can also watch live TV on their mobile phone or tablet from anywhere in their home.

“I’ve had Link TV for months now and I really like it,” says Anna Marie of Woodstock, “I just love all the added features!”

With plenty of new summer TV shows to choose from, customers now have more options than ever before! However, the hustle and bustle of summertime makes for busier schedules with less time for TV; fortunately, Link TV ensures that customers never miss their favourite shows with the Catch-Up TV feature. Viewers have the ability to watch a live show or event up to 24 hours after it originally airs, so they can get back to enjoying those sunny months, while their TV takes care of everything else.

“The Catch-Up TV feature allows Execulink customers to spend less time missing their shows and more time watching them,” says Ian Stevens, CEO of Execulink Telecom. “We understand how busy life can be, so we make it our mission to ensure that our customers have a worry free TV experience!”

With the flexibility to *watch when you want*, Execulink has created a TV experience that allows Woodstock customers to take back their time and watch TV at their leisure!
